

Polyrol Provides **Quality, Service & Value**

QUALITY

Polyrol is your best source for a comprehensive selection of quality pre-opened bags on a roll. We specialize in providing pre-opened poly bags that are guaranteed compatible with industry standard bagging systems. Our product line also includes roll stock film and tubing.

We extrude, print and convert our own materials at multiple plants in the U.S., where we manage the full process to ensure our materials meet our strict quality standards.

SERVICE

Our team offers the expertise and support to provide you with the best flexible packaging solutions for your business. Our in-house graphic design team can help create unique package designs.

We also feature a wide-ranging inventory of stock bags and many are available for shipping in two business days.

VALUE

Our flexible materials are competitively priced and offer superior value, with some of the best lead times in the industry.

For high quality materials combined with superior service and value, look no further than Polyrol for your flexible packaging needs.

PRE-OPENED BAGS ON A ROLL

Stock Bags:

- Available in sizes from 2" x 3" to 10.5" x 15"
- Choose from light duty, standard duty, extra tough, super tough
- Large volume of bags in stock
- Fast delivery, many bags ship in two business days

Custom Bags:

- Plain
- Large sizes for wide bag applications
- Custom printed with text, graphics and bar codes
- Up to 10 color printing; line, process or screen printed
- Variety of special features such as hanger and air relief holes, easy open perforations and more

Pre-Opened Bags on a Roll are available in the following core films:

Clear Polyethylene- Clear, White or Clear/White Combo

- A high-pressure low-density polyethylene material has high clarity to showcase your product for many retail applications. It also has excellent printing characteristics for graphic-intensive applications.

Enhanced Polyethylene- Clear, White or Clear/White Combo

- A high-strength, puncture-resistant film without the premium cost of higher clarity resins. It is easy to work with, imprintable and ideal for spare parts kits, medical devices, automotive and hardware packaging. Light duty, standard duty, extra tough, super tough and mega tough films are available for a wide range of applications.

Non-Static (Clear, pink and blue)

- A linear low density polyethylene that is amine free and designed to package non-ESD static-sensitive electrical and electronic components. This unique material protects the packaged product against a static discharge.

Black Opaque

- Durable and provides security and protection from light and particulates.

Rust Resistant

- Rust resistant and prevents the corrosion of ferrous metals, but does not alter the electrical or mechanical properties of the bagged product.

High Density Polyethylene

- A high-density, rich blend of polyethylene resins rid of slip agents and other additives that can cause undesirable reactions. It also offers a superior degree of scratch resistance.

Mailer / Parcel

- Co-extruded, white opaque film made from a unique blend of resins that offer superior sealing, strength and security.

Polypropylene

- A high-clarity film that resists odor transfer and specifically designed for excellent optical properties and seal strength.

Nylon

- A 5-layer coextruded film featuring excellent barrier properties, superior tear resistance, good clarity and strength.

ROLL STOCK FILM:

Clear Polyethylene- Clear, White or Clear/White Combo

- Features excellent printing characteristics for graphic-intensive applications.

Enhanced Poly- Clear, White or Clear/White Combo

- High-strength, easy to work with and exceptional puncture resistance.

Mailer Parcel Film

- Co-extruded white, opaque film made from a unique blend of resins that offer superior sealing, strength and security.
