

Your Best Source for Roll Stock Film

We extrude, print and convert our roll stock film and poly tubing at multiple plants in the U.S., where we manage the full process to ensure our materials meet our strict quality standards. A variety of film types and roll sizes are available, including clear or white films that can be printed up to 10 colors.

At Polyrol, we manufacture competitively priced, quality roll stock film, with some of the best lead times in the industry.

We even offer a more environmentally responsible biodegradable blend!*

Our product line also includes pre-opened bags on a roll.

ROLLSTOCK FILM MATERIALS AVAILABLE:

Clear Polyethylene

- A low-density polyethylene material that has great clarity to showcase products for many retail applications. It also has excellent printing characteristics for graphic-intensive applications.

Enhanced Poly

- A high-strength, puncture-resistant film that is ideal for spare parts kits, medical devices, automotive and hardware packaging.

Mailer Film

- Co-extruded, opaque film made from a unique blend of resins that offer superior sealing, strength and security.

Roll Sizes and Film Gauges:

- 6 inches to 50 inches wide
- 1.32 mil to 4 mil thickness
- 10 inches to 24 inches OD with 3 inches core

Colors and Styles:

- Clear, white and clear/white combo
- Plain or printed up to 10 colors, including surface or reverse printing

Film Configurations:

- Tubing with side seals
- Sheeting
- Double wound sheeting

* Our biodegradable material will take one to five years to biodegrade. California currently prohibits labeling any plastic product as biodegradable.
